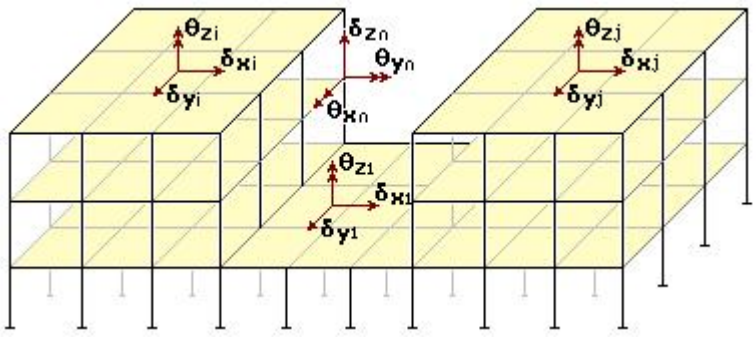
STA MÜH. MÜŞ. LTD. ŞTİ.



STA4 programı, çok katlı betonarme yapıların 3 boyutlu analizini ve entegre olarak çizimlerini yapan entegre paket programdır. Yapının tümü için global stifnes matrisi bir defada kurulur ve bloklama tekniği ile deplasmanlar bulunur. Kat düzlemindeki plakların yatay düzlemde sonsuz rijitliğini dikkate alarak, kat düzlemindeki δx, δy, θz deplasmanları için her katta 3 bilinmeyen, eleman uçlarında θx, θy, δz deplasmanları için her noktada 3 bilinmeyen kullanarak bir noktada 6 serbestlikli betonarme yapılara özgün stiffnes matrisi ile çözülmektedir. Kiriş ve kolon elemanlarında kayma deformasyonları ile burulma etkileri dikkate alınmaktadır.
Denklem takımını; çözümünün hızlı olabilmesi için uç nokta numaraları, program tarafından nokta optimizasyonu ile minimum hafızada çözecek şekilde düzenlenir. Yapı+temel birlikte çözülebilmekte olup, temel stiffnes matrisleri winkler hipotezi ile kurulmaktadır.

Global stiffnes matrisinde dikkate alınan hususlar:
-Kirişlerin kolon ve perdelere içindeki kısımları, sonsuz rijit alınarak yük ve rijitlik matrislerinin düzenlenmesi.
-Geniş perdelere zayıf yönde saplanan kirişlerin, fiktif kolon kontrollu elastik ankastre olarak çözümü.
-Geniş perdelere rijitliği yönünde saplanan kirişlerde, kayma deformasyonların dikkate alınması.
-Altındaki kolon ile statik eksenlerinde kaçıklık olan kolonlarda, eksenel yük eksantirikliğinin stiffnes matrisinde dikkate alınması.
-Dinamik analizde; CQC(Complete Quadratic Combination) metodu ile %5 sönüm yüzdesine göre kuvvetlerin bulunması.

STATİK ANALİZ YÜK KOMBİNASYON NOTASYONLARI:

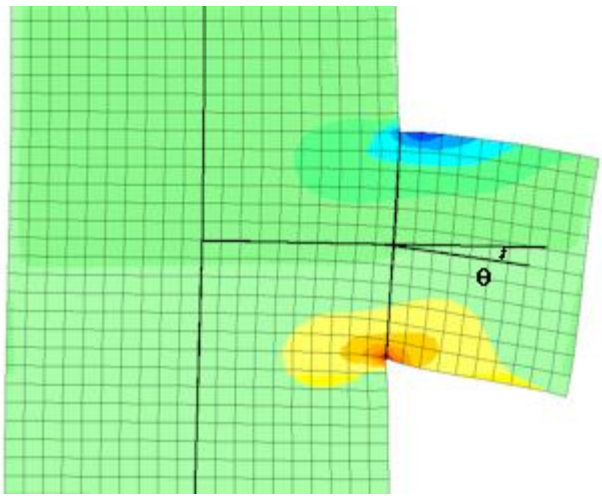
PERDE ve KOLONLARDA EKSANTRISITE



STA4-CAD Perde ve kolonlarda eksenel yük kaçıklıklarını opsiyonel olarak dikkate alır. Geometrik akslar, elemanların bilgi tanımi içindir. Statik hesaplarda, elemanların ağırlık merkezlerini dikkate alarak gerçek eksenlerle çalışır.
Perdelere zayıf yönünde saplanan kirişlerin, düşey plak gibi davranan perdedeki lokal eğilme deformasyonunu sonlu elemanlara eşdeğer yöntemle elastik ankastrelik değerlerine göre opsiyonel çözüm yapabilir.

KAYMA DEFORMASYONU ve RIJITLIK BOLGELERI

STA4-CAD Perde ve kolonlarda kayma deformasyonlarını rijitlik matrislerinde dikkate alır. Aynı şekilde rijit perdelere bağlı kirişlerin kayma deformasyonlarınıda perdelerin genişlikleri oranında dikkate alarak rijitlik matrislerini oluşturur.
Kirişlerin kolon kısmındaki bölgeleri, gerekse kolonların kiriş kısmındaki bölgeleri sonsuz rijit kabul edilerek moment alan teorisi ile sayısal integrasyon yapılarak gerçek rijit matrisi kurularak çözüm yapılır.
Ayni şekilde kirişlerin yük matrisinde kolon kısmındaki bölgede sonsuz rijit davranışı dikkate alarak, ankastrelik tesirlerini bulur.
